

Extranet

You will get email from Extranet in December!

Last year FEPTO AM decided that we will start to use membership extranet. It was introduced in FEPTO NL. Here is some more information of this service, which will be in use next January, 2017.

All present members and their contact information is now in extranet. We start to trial run the system in December. Each member will get email from extranet before December 15th, to the email of contact person.

How to use and what to do in Extranet?

Extranet is based on internet, it is easy to use, and it only needs internet connection to work. In January, there will a link on FEPTO internet pages (fepto.com) to extranet. FEPTO members will get instructions how to use FEPTO Extranet in the beginning of January, 2017.

Members can update their own contact addresses in Extranet, and receive information from FEPTO on time and to right persons.

FEPTO Council is going to use different functions in Extranet:

- information connected to a member (name, address, email, etc.) and contact persons,
- sending emails and newsletters to members,
- membership fee information (sent and paid invoices, etc.).

Information in Extranet

This information will be in Extranet:

1. Member's name, address, type of membership, and date when membership started
2. Name of contact persons:
 - General issues, e.g. membership fees
 - Research
 - Ethics
 - Training.

Some of this information we already have in Council (1. and 2.a). Names and emails of contact persons for Research, Ethics, and Training will be collected before AM 2017 in Sigtuna, Sweden.

Extranet is a safe and guarded system. Members can access their own information, and council can access information of the whole membership. For others, it is closed.
