

From external violence to internal shadows: When psychodrama helps to confront reality

This year, we choose to give priority to **the process of the conference as a whole**, instead of usual workshops with diverse thematic and style. This means that the facilitators (conducting the workshops) will be available to sustain and accompany the groups in the here and now.

The conference will be centered on the theme developed on the first evening by Nikos and Vincent: *From external violence to internal shadows, when psychodrama helps to confront reality*. From this first evening conference, participants will be invited to explore more this thematic.

Facilitators, through the workshops of Saturday and Sunday, will sustain this exploration with their own psychodramatic and sociodramatic skills, in their own style

There will be time for facilitators to meet each other and collaborate in this adventure of accompany the process through their different workshops.

There will always be a French speaking workshop available for participants who need to work in French.

If you are interested in conducting a workshop, alone or with someone else, in the spirit of the conference, please send us your application writing a mail to: fepto.liege2023@gmail.com
