

# New Internet platform

## INTERNET PLATFORM FOR FEPTO MEMBERS

Communication - Discussion – Information - Networking

The FEPTO Council is about to establish an internet platform for all our members. We thus want to answer and to take responsibility for the needs of an organization working on an international level making use of the possibilities and chances of communication the internet offers in the time of digitalization.

In a safe place all members are invited and will be able to participate constantly all over the year in all activities of FEPTO, to discuss, share and communicate common projects, to keep contact – on behalf of FEPTO-affairs – with each other.

This platform is still in progress and not yet completely elaborated.

If you are interested in this process and want to participate already now, you may address to Fred Dorn, responsible for networking and development: [fred\\_dorn@icloud.com](mailto:fred_dorn@icloud.com).

You will get immediately access to have a look on it, to make your comments and proposals.

**Fred Dorn**  
Chair of Development & Network Committee
